

Document 02

Fusion of powerfull basses and machine noises, Document 02's music has a very electronic feel, reminiscent of 80's synths. The different rhythms used are geared towards listening rather than dancing, letting the auditor mind-travel and imagine pictures beyond the audio support. Each track brings a modern concept forward: unurbanisation, industrial accidents, modern stress...

A progressive industrial electronic music, reminiscent of Skinny Puppy, Autechre and Vangelis.
